

# Are You Suffering From Pain After An Accident?

## EFFECTIVE PROVEN RELIEF

Call (910) 483-7704

### If You've Been In ... An Accident READ THIS IMMEDIATELY!!!

Martin, CA - If you've been in an Auto Accident, read this so you or a family member do not have to suffer.

#### TRUE STORY:

There was a boy, and he was riding with his father. They were on the freeway, when all of a sudden, all the traffic stopped. He was sitting in the front seat, but he did not have his seat belt on. He slid forward and hit his head on the hard windshield, even though they weren't traveling that fast.

#### THE RESULTS:

34 years later, the man who was the boy cannot lay in bed without hurting. He can't sleep well, he always has a stiff neck and he takes medications to help his pain.

**If you've been in an accident, you were most likely hurt.**

FACT: It's estimated that close to 40% of people that are in a auto accident, even a minor one - will suffer from ongoing chronic pain. (*Journal of the American Academy of Orthopedic Surgeons, 2007*)

*She does not want to suffer from pain if she's with her parents in an accident*

Now you might tell me that your accident wasn't bad, and you felt OKAY, but now, you are experiencing pain. You might have been in the accident six months ago, but now you hurt from the internal damage from the accident.

If these sound like you, make sure you call the office today. The longer you wait to get examined, the worse your problem can become.

Accident injuries NOT only increase the incidence of chronic neck and shoulder pain, they also significantly increase the incidence of other health problems.

In other words, auto accident injuries cause MORE than just neck pain. They can damage your entire body.

#### 17 Year Study

In the longest study ever performed on car accident patients (a study looking at the health status 17 years after the person's injuries), they found... 55% of the auto accident people were still suffering from pain caused by the original accident.

- 90% of them were given a cervical collar for their neck injuries and they are suffering from chronic neck pain - 6 months later (Spine, 2000)

- 2% of the injured patients will have severe pain and health problems that require ongoing medical investigations and drugs 7.5 years after being injured. (Injury, 2005)
- 1 in every 100 (1%) people on planet Earth... suffer from some type of chronic neck pain - caused by a car accident. (Pain, 1994)

#### This Happens About Every 10 Years To Everyone

- Almost every American can expect to be in a motor vehicle collision once every ten years.
- Motor vehicle collisions are the number one cause of death of our children.

#### 360,000 People DIE Every Year

- Since 911 (September 11, 2001), about 360,000 Americans have DIED in motor vehicle crashes.

- Since Henry Ford introduced the mass-produced motorcar in 1913, more than 2.5 million Americans have met their deaths in a car.

And the millions of Americans who did not die from their car accidents - were injured & most of them were injured permanently.

#### The Bottom Line...

To understand your car injury and the necessary treatment to help you avoid future pain, you need to know the answers to these 3 questions:

1. What tissues were damaged?
2. What are your options?
3. What is the best type of treatment for your case?

It is inevitable that you will develop chronic pain if you aren't taken care of properly. If you don't want CHRONIC pain & suffering, if you want to get out of pain and stop the degeneration of your neck and spine, you need to make a decision.
